

SHIMARK AHMED

Business Analyst

+94 76 7455 458 · shimark.ahmed.2002@gmail.com · linkedin.com/shimark-ahmed · Portfolio

PROFESSIONAL SUMMARY

Results-driven Business Analyst with **2+ years of experience** eliciting, documenting, and validating requirements across fintech, GovTech, real estate technology, and ArchViz/software domains. Skilled in translating complex business needs into structured BRDs, SRS documents, user stories, and BPMN process models that development and QA teams can act on directly. Experienced working in **Agile/SCRUM environments** alongside cross-functional, internationally distributed teams — with a proven track record of reducing mid-sprint ambiguity and supporting **100% on-time milestone delivery**. Holds an IBM Business Analysis Professional Certificate and a Google Project Management Certificate; currently supporting delivery of a **large-scale Unreal Engine digital twin** at an Australian ArchViz studio. Actively leverages AI tools including ChatGPT, Claude, and Microsoft Copilot to accelerate requirements documentation, sprint reporting, and stakeholder communication.

PROFESSIONAL EXPERIENCE

Associate Project Manager / BA | Atlas Labs · Colombo, Sri Lanka (Hybrid) *June 2026 – Present*

- ▷ Gather and document requirements for software features across the PMD (software) department, translating stakeholder needs into structured specifications and Jira user stories.
- ▷ Perform gap analysis between current delivery processes and project objectives, identifying blockers and recommending workflow improvements to the Project Manager.
- ▷ Map cross-department processes across ArchViz and software teams, maintaining shared documentation that keeps developers, 3D artists, and stakeholders aligned.
- ▷ Maintain and groom the Jira backlog for the **Tavistock Lake Nona digital twin** project — refining epics, assets, and tasks to ensure sprint clarity and prevent scope drift.
- ▷ Support sprint reviews and retrospectives by tracking delivery against acceptance criteria and surfacing requirement gaps before they reach development.
- ▷ Produce RAID logs, risk mitigation plans, and sprint update documentation — bridging communication between technical teams and client stakeholders.
- ▷ Utilised AI tools including ChatGPT and Claude to accelerate sprint documentation, requirements drafting, and internal communication preparation.

Business Analyst | Arimac · Colombo, Sri Lanka *August 2024 – April 2025*

- ▷ Elicited, documented, and validated business and technical requirements for fintech enterprise solutions; produced **BRDs, SRS documents, Change Requests, and Agile user stories** with full acceptance criteria.
- ▷ Facilitated stakeholder workshops and requirement sign-off sessions, ensuring alignment between business objectives and technical deliverables before development began.
- ▷ Refined and groomed backlog items with development teams, reducing mid-sprint clarification requests and improving sprint velocity.
- ▷ Supported **Microsoft Dynamics 365** ERP and CRM integration projects, mapping current-state processes and defining future-state requirements using BPMN notation.
- ▷ Modelled business processes in Visio and Lucidchart, producing process diagrams used as shared reference artefacts across dev, QA, and business teams.
- ▷ Authored and maintained traceability matrices to ensure all requirements were covered by test cases and delivered to acceptance criteria.

Business Analyst Intern | Qnetwork · Ontario, Canada (Remote) *March 2024 – August 2024*

- ▷ Gathered and structured requirements for real estate technology platforms through stakeholder interviews and workshops, translating outputs into functional specifications.
- ▷ Identified inefficiencies in existing user workflows through as-is process analysis, proposing and documenting to-be improvements that informed platform enhancements.
- ▷ Created process flow diagrams and system documentation in Visio and Lucidchart, improving clarity and reducing development ambiguity.

- ▷ Produced structured meeting minutes and requirement documentation to maintain stakeholder alignment across remote teams.

Project Coordinator | **Optimo Gov** · London, England (Remote)

April 2025 – June 2026

- ▷ Supported requirements validation and UAT coordination for municipal venue and facility management systems, verifying that delivered features met defined acceptance criteria.
- ▷ Tracked defects and coordinated issue resolution between development, QA, and business stakeholders, enabling go-live launches with **zero critical post-release incidents**.
- ▷ Owned backlog prioritisation in collaboration with product owners, managing scope change requests and maintaining a clean, sprint-ready backlog.
- ▷ Produced structured status reports, RAID logs, and meeting minutes for internal leadership and client stakeholders across distributed teams.

KEY PROJECTS

Tavistock Lake Nona – Unreal Engine Digital Twin (*ArchViz / Atlas Labs*)

- ▷ Support requirements definition and backlog management for a **large-scale digital twin of Lake Nona, Orlando** built in Unreal Engine for Tavistock Development, a major US real-estate client.
- ▷ Translate stakeholder requests into structured Jira epics, assets, and tasks — maintaining sprint clarity and traceability across a complex multi-team delivery.
- ▷ Bridge communication between developers, 3D artists, and the Project Manager by maintaining accurate process and delivery documentation each sprint.

Peoples Pay – Digital Wallet Platform (*Fintech / Arimac*)

- ▷ Led end-to-end requirements gathering for a large-scale digital wallet product serving enterprise clients across multiple markets — from initial elicitation through to sprint-ready user stories and acceptance criteria.
- ▷ Produced BRDs and SRS documents that served as the single source of truth for development and QA throughout the product lifecycle.
- ▷ Facilitated requirement sign-off with business stakeholders, ensuring scope was controlled and documented before development commenced.

Wyndham City Council – Municipal Digital Platform (*GovTech / Optimo Gov*)

- ▷ Supported requirements validation and UAT for a venue and facility management system rolled out across multiple council departments.
- ▷ Maintained deliverables register, issue log, and stakeholder alignment documentation; contributed to **100% on-time delivery** of all key milestones.
- ▷ Produced client-facing progress reports and internal BA artefacts throughout the project lifecycle.

SwingRight – AI Cricket Shot Analysis System (*Final Year Project / Solo*)

- ▷ Independently defined the full requirements scope for **SwingRight** — an AI-powered cricket shot analysis web application — producing UX wireframes, functional specifications, and system documentation.
- ▷ Built a pose comparison pipeline using **MediaPipe** for landmark detection and **Dynamic Time Warping (DTW)** to score shot accuracy against reference technique.
- ▷ Managed the complete project lifecycle solo: requirements, design, development, testing, and delivery — demonstrating end-to-end ownership from brief to working product.

Breeze – Real Estate Web Application (*Personal Project / Team Lead*)

- ▷ Defined business requirements, user workflows, and feature scope for **Breeze**, a real estate property listing web application, coordinating a cross-functional team across design and development.
- ▷ Produced process documentation and stakeholder communication artefacts to keep team delivery aligned with business objectives throughout the project.

CORE COMPETENCIES

Requirements Engineering: Stakeholder Elicitation · BRD / SRS / CR Authoring · User Story & Acceptance Criteria Writing · Requirements Traceability · Sign-off Facilitation · Scope & Change Control

Process Analysis: As-Is / To-Be Process Mapping · BPMN Notation · Gap Analysis · Workflow Optimisation ·

Root Cause Analysis

Agile & Delivery: Agile / SCRUM · Kanban · Backlog Grooming & Prioritisation · Sprint Planning Support · UAT Coordination · Defect Tracking · RAID Log Management

Technical: ERP & CRM Integration (Microsoft Dynamics 365) · Change Management · OKR Framework · REST APIs · API Testing (Postman) · SaaS Environments · Working Knowledge of Unreal Engine & ArchViz Pipelines

Soft Skills: Stakeholder Management · Cross-functional Collaboration · International Team Communication · Analytical Thinking · Adaptability

TOOLS & TECHNOLOGIES

BA & PM Tools: JIRA · Confluence · ClickUp · Trello · Monday.com · MS Project · Asana · Notion

Process & Diagramming: Visio · Lucidchart · draw.io · Balsamiq · Miro · Figma (Basic)

Data & Reporting: SQL · Power BI · Tableau · Microsoft Excel

Collaboration & AI: Slack · Microsoft Teams · Google Workspace · Microsoft Copilot · ChatGPT · Claude

ERP / CRM: Microsoft Dynamics 365

Development & APIs: React · HTML · CSS · Python · JavaScript · REST APIs · Postman

Digital Marketing: GA4 · GTM · Google Ads

EDUCATION

BSc (Hons) Computer Science · Staffordshire University, UK

2022 – 2025

CERTIFICATIONS

- ▷ IBM Business Analysis Professional Certificate
- ▷ Google Project Management Certificate (Coursera)
- ▷ Google Analytics 4 (GA4) Certification
- ▷ Google Tag Manager Fundamentals

PROFESSIONAL DEVELOPMENT & LEARNING

- ▷ Currently preparing for the **PSM1 (Professional Scrum Master I)** certification.
- ▷ Developing data analysis and visualisation skills in **Power BI and Tableau** for requirements reporting and stakeholder dashboards.
- ▷ Building familiarity with **SAFe (Scaled Agile Framework)** for enterprise-level Agile BA practice.
- ▷ Building familiarity with **Design Thinking** methodologies for user-centred requirements elicitation and solution validation.
- ▷ SQL — foundational proficiency for data querying and validation; currently strengthening through active practice and project application.
